— List of Papers —

(1) The 2011 municipal elections in South Africa and new trends since the 2009 national elections (Jan M Greben*, Chris D Elphinstone & Jenny P Holloway)

(2) An aid to decision making using analysis of variance in a protective clothing industry in Zimbabwe (Tichaona C Mazuru)

(3) An analysis of the impact of HIV/AIDS on the recruitment of children into the orphaned and vulnerable children category (OVC) in Zimbabwe (Grace Chingwe)

(4) An analysis of price indices of electrical appliances in South Africa (Happy Maluleke*, 'Maseka Lesaoana & Mokowe Makwela)

(5) Algorithmic approaches to solving multi-period delivery vehicle master routing problems (Angela L Rademeyer)

(6) Analysis of data from an agrosite experiment using Genstat and SPSS (Kudakwashe Hove)

(7) Analysis of factors affecting academic performance of the disabled students at the universities in Limpopo province, South Africa (Murendeni Nemukula* & Yibas Negussie)

(8) Application of factor analysis to the 2009 General Household Survey of South Africa (Simon Monyai*, 'Maseka Lesaoana & Philimon Nyamugure)

(9) Application of linear programming in water distribution using pumps (Philimon Nyamugure)

(10) Applications of the analytical hierarchy process and statistical decision theory in commercialisation (David C Zvipore)

(11) Assessment of the maternal mortality rate in Zimbabwe (Shingirai M Svinurai)

(12) Balancing home and away matches in league sports tournaments: A case study (Martin P Kidd*, Alewyn P Burger & Jan H van Vuuren)

(13) Bankruptcy prediction (Abel Maeteletsa* & Jan W Kruger)

(14) A behavioural-based multi-objective decision making framework for corporate climate change response (Muriel Chinoda* & Jan W Kruger)
(15) The causal structure may be different from the highest posterior probability structure if it is not a tree structure (Jan W Kruger)

(16) Choosing an appropriate transformation for experimental data in the case of violated ANOVA assumptions (Kudakwashe Hove)

(17) Coastal threat evaluation decision support
(Jacques du Toit* & Jan H van Vuuren)

(18) The coherence between logistics management, operations research and systems analysis (Wessel J Pienaar)

(19) Constraints driving the development of rich vehicle routing problems
( Relita Pretorius)

(20) Constructive heuristics for the Residential Waste Collection Problem
(Elias J Willemse* & Johan W Joubert)

(21) Coordinating price and capacity decisions in inventory systems with stochastic demand: A case study in a chemical processing plant in Zimbabwe (Nelson Lawrence, Nicholas Tayisepi* & Samson Mhlanga)

(22) Credit rating mechanisms using multivariate adaptive regression splines
(Hausitoe Nare*, Philemon Nyamugure & Precious Mdlongwa)

(23) Daily electricity demand forecasting in South Africa
(Ntiyiso A Makukule*, Caston Sigauke & 'Maseka Lesaoana)

(24) Data envelopment analysis in the fast food industry
(Kolentino N Mpeta* & Givemore Munyati)

(25) Decision support for a new stability enhancement system at the Sasol Synfuels Air Separation Unit (Hentie van den Berg* & Marlize Meyer)

(26) Decision support w.r.t. facility location and fleet composition for FoodBank Cape Town (Ernest J Lanz*, F Esbeth van Dyk & Jan H van Vuuren)

(27) Decision support w.r.t. generator maintenance scheduling in the energy sector
(Bernard Schlünz* & Jan H van Vuuren)

(28) Demand chain analysis for better planning in the steel foundry industry
(Moreblessings Taremba)

(29) Demand chain management — The evolution
(Dag Ericsson)

(30) Demand chain management — The implementation
(Dag Ericsson)
(31) Determining the optimal log position during primary breakdown, using simulated annealing (Fritz A van Zyl, Liezl van Dyk, C Brand Wessels & Tanya E Lane-Visser*)

(32) An econometric study of currency crises in developing economies: A case study (Caston Sigauke)

(33) Effective logistics and supply chain management: A theoretical analysis (Moses Dowart)

(34) Enhancing supply chains through implementing transport management systems in Zimbabwean industries (Tawanda Mhuri* & Brian JM Chiripanhura*)

(35) Enumeration of sets of orthogonal Latin squares (Martin P Kidd*, Alewyn P Burger & Jan H van Vuuren)

(36) Estimating the threat of water scarcity in the Breede River Valley: A forecast-based analysis (Stephanie E Bester* & Tanya E Lane-Visser)

(37) Estimation of multivariate proportional hazards model parameters through artificial bee colony optimization (Wiehahn A Carstens*, Tanya E Lane-Visser & PJ Vlok)

(38) An evaluation of the efficiency of self-organising versus fixed traffic signalling paradigms (Mark D Einhorn*, Alewyn P Burger & Jan H van Vuuren)

(39) An evaluation of the implications of predictive patient admission algorithms on African healthcare systems (Ruan A Daffue* & Tanya E Lane-Visser)

(40) Evolutionary games on graphs (Martijn van der Merwe*, Alewyn P Burger & Jan H van Vuuren)

(41) Exposing the hidden dynamics of metaheuristics through visualisation (Donald L van Blommestein* & Tanya E Lane-Visser)

(42) Finding the optimal South African freight energy management strategy with archived multiobjective simulated annealing (Tanya E Lane-Visser* & Marianne JWA Vanderschuren)

(43) Heuristic applications to the Hostel Space Allocation Problem (Aderemi O Adewumi)

(44) How to measure military readiness? (Winnie C Pelser)

(45) Human resources decision support using Sasol Technology’s Employment Equity Target Assessment Model (Lieschen Venter* & Michele Fischer)

(46) Humanitarian operations research in Southern Africa (Hildah Mashira* & Amon Masache)
(47) The impact of the liquidity crunch on the manufacturing sector during the period 2009–2010 (Lenyora K Sihwa)

(48) The impact of media coverage on the transmission dynamics of human influenza (Jean M Tchuenche & Nothabo Dube∗)

(49) The importance of HIV specific Cytotoxic T cells on HIV and Myco-tuberculosis coinfection dynamics (Chipo Mufudza)

(50) An inventory management system for optimising product availability and capacity utilisation (Kelvin T Chirenje)

(51) Is a bird in the hand worth two in the bush? (Leanne Scott)

(52) Job shop scheduling to minimise tardiness (Juwa C Nyirenda)

(53) A linear programming approach to sustainable poultry production in the small farms of Makwa Hwange, Zimbabwe: A human-poultry food production case (Desmond Mwembe)

(54) Local government elections 2011: Some personal perspectives (Hans W Ittmann)

(55) Locomotive scheduling in freight at Mpopoma Train Station (Amon Masache)

(56) Maintenance & production planning using LP and simulation at NFA Oil Plant (Samson Mhlanga∗, Tatenda N Mushuku, William M Goriwondo & Nicholas Tayisepi)

(57) Maximising production of an in-store bakery using linear programming (Terrence Biningu & Simbarashe FM Mubaira∗)

(58) Measures for share selection (Jan W Kruger)

(59) Metaheuristic approaches for order sequencing in a directed picking line (Anton P de Villiers∗, Jason Matthews & Stephan E Visagie)

(60) A minimax multivariate control chart using a nonlinear polynomial function (Ademola J Adewara∗, Kayode S Adekeye, O Ebenezer Asiribo & SB Adejuyigbe)

(61) Minimizing the (weighted) number of tardy jobs: A review (Muminu O Adamu & Aderemi O Adewumi∗)

(62) Modelling and analysing the price structure of houses in the dollarised economy of Zimbabwe (Dumisani D Dube∗ & Chipo Mufudza)

(63) Modelling the effect of stress on the dynamics and treatment of tuberculosis (S Dorothy Hove-Musekwa)
(64) **Modelling HIV/AIDS in a mixed population using an agent-based approach** (Edinah Mudimu* & Gerhard N Engelbrecht)

(65) **Modelling volatility and financial market risk of shares on the JSE** (Rhoda M Makhwiting*, ’Maseka Lesoana & Caston Sigauke)

(66) **A new approach to the Quadratic Assignment Problem** (Elias Munapo)

(67) **A nurse rostering algorithm for a district hospital in South Africa** (Maria J Treurnicht*, Tanya E Lane-Visser, Liezl van Dyk & Sonja S Friedrich)

(68) **Observed trends in the use of cereal straws and cotton seed hulls as sole substrates in the cultivation of Pleurotus ostreatus mushrooms in Zimbabwe** (Emiliah Masenda*, Kanisiyo Gazimbi, Benjamin Chirambiwa, Ncomulwazi Khumalo & Hosea Machokoto)

(69) **Operations research at Ford Motor Company** (Erica Klampfl)

(70) **Operations research at Sasol — The making of an INFORMS prize winning team** (Marlize Meyer* & Michele Fisher)

(71) **Operations research in telemedicine** (Alwyn J van Zyl* & Liezl van Dyk)

(72) **Operations research in Zimbabwe: Origins, development and the way forward** (Daniel Maposa)

(73) **Optimal production lot size models with rework and scrap** (Mthokozisi Nkala* & Amon Masache)

(74) **Paving the way for the use of prediction modelling in a hospital environment** (Ilse van Zyl*, Tanya E Lane-Visser & Liezl van Dyk)

(75) **Post-catastrophe decision making** (Ian Durbach* & Gilberto Montibeller)

(76) **Random sampling: An essential tool for the operations researcher** (L Paul Fatti)

(77) **Scheduling jobs on parallel machines to minimize a weighted number of early and tardy jobs** (Muminu O Adamu & Aderemi O Adewumi*)

(78) **Solving a multi-objective micro milling problem using simulated annealing** (Erich C Essmann* & Tanya E Lane-Visser)

(79) **Spreading operations research across a large company** (Martha FP Harmse)

(80) **Spreadsheet-based methods for the teaching of statistical and OR methodologies and technologies** (Graham D Barr* & Leanne Scott)

(81) **Statistical modelling using GENSTAT DISCOVERY in experimental work** (Kudakwashe Hove)
(82) *Supply chain management information systems: An artificial intelligence perspective* (Khesani R Chilumani\*, Bayeza S Mangena & Eli G Mtetwa)

(83) *Swarm intelligence algorithms for OR problems: Successes and trends* (IC Obagbuwa & Aderemi O Adewumi\*)

(84) *Teaching OR using Risk Solver Platform for Education* (Wim R Gevers)

(85) *Theoretical assessment of the transmission dynamics of Leprosy* (Edward Chiyaka\*, Tazvitya Muyendesi, Philmon Nyamugure & Farikayi Mutasa)

(86) *Time series analysis of the volume of manufacturing data* (Theophilous Mathema)

(87) *Tracking concept drift in spam filtering with generalized additive neural networks* (Tiny du Toit)

(88) *Using the economic order quantity model in managing inventory: The case study of NOCZIM* (Tanyaradzwa Nzwengende)

(89) *Using logistic regression to predict poverty in South Africa* (Rampedi L Mothapo\* & Mokowe R Makwela)

(90) *Using stochastic modelling to investigate supply chain disruptions* (Ozias Ncube\* & VS Sarma Yadavalli)

(91) *Utilisation of multicriteria influence diagrams in simulation metamodeling* (Jouni Pousi, Jirka Poropudas, Kai Virtanen & Raimo P Hämäläinen\*)

(92) *Winning the impatient customer — Weighing the trade-offs in waiting line situations* (Ephraim Makoni\* & Jack A Urombo)
